

Q1. These images of our nearest star, the Sun, were taken with different types of cameras. Physicists at the Dublin Institute of Advanced Studies use these images to learn more about our Sun.

Analyse the images carefully, **noting any features or patterns** in the observations box below.

LU: 6 June 2021 RU: 17 November 2017 LL: 7 July 2012 RL: 17 November 2017

My Observations (you may wish to include diagrams):

Q2. Note some **questions you might have** about the Sun and the things you notice in the images in Q1.

My Questions:
