

Q1. Imagine you are an astronaut who has just left Earth's atmosphere. Use the box below to draw a picture of what you can see around you.

Q2. Continuing on your astronaut journey, do you think there are any sounds you can hear?

Q3. Are there things or processes happening that have an effect on space which we cannot see? If yes, give any example and explain why.

Q4. Based on your ideas from Q1-3, what questions do you have about Our Solar system and how parts of it were formed.
